Dear Customer,

**Re: Product Change Notification for S0941-46R.**

Following further testing on the S0941-46R shield can clip, we are reducing the recommended shield thickness use for this clip.

Previous shield thickness range:

- 0.15 to 0.20mm

New recommended shield thickness range:

- 0.135 to 0.16mm

If you require a replacement shield can clip suitable for 0.20mm can thickness, we would recommend switching your design to S0951-46R. It has an identical PCB pad layout, so no board changes will be required. The S0951-46R is just a bit taller, 1.28mm compared to the 1.00mm of S0941-46R.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Change Team
